

## Known Issues in Elevate® 1.0.2

4/4/2018

To assist our users this is a list of known issues with Elevate.

**Known Issue 1:** In Multirow, "Adjust Quilt Length" will crash the Elevate app if a value with two decimal points is entered.

***Solution:*** In "Adjust Quilt Length" make note of the existing pattern length, then click "Clear" and type the new pattern length. Or be careful as editing the length to not enter a second decimal point.
